Engagement Model :
Fixed Project Billing

Client Overview

A leading unique design and manufacturer from USA which produces a wide variety of fireplaces and its accessories. The company was using SAP ECC 5.0 and was in the plan of upgrading to the latest version of SAP. While evaluating multiple vendor, Incesol was awarded to proceed with the upgrade project due to its extension ERP and system integration experience.

Challenges

- The upgrade project was triggered to keep the company under SAP main stream maintenance program such as to leverage new business functionality 6.0.
- Cost impact on the extended AMC for ECC 5.0 version.
- Timing was a major concern as the company operates 24X7 and such decision of upgradation could lead to a revenue leakage.

Implementation Highlights

- Streamline business processes by providing only the essential screen elements and data to complete transactions faster and more accurately through fewer data entry fields and reduced scrolling.
- Create a collaborative partnership model in order to implement and test system upgrade successfully with minimal disruption to the existing business processes.
- A technical upgrade from SAP 5.0 to ECC6.0 and enhancement to standard industry solutions.
- Automate repetitive tasks and simplify complex screens through pre-filled fields.
- Execute a thorough testing regime from planning and communication, through to go-live verification and ongoing performance monitoring.
- Provision of local project management and quality assurance resources to manage and reduce upgrade risk and complexity.

Incesol's Achievements

Incesol's SAP professional services team have delivered over 7 SAP upgrade and enhancement projects on-time and within budget over the last five years. Our pilot upgrade practice, auto-upgrade toolset and upgrade methodology makes projects more cost competitive and predictable by:
