

SAP BTP IMPLEMENTATION & APPLICATION ACTIVATION

Client - Renewable Energy & Infrastructure Solutions

Challenges

- Delay in activating key SAP Fiori applications due to dependency on embedded components
- Need to enable real-time dealer operations across geographically distributed branches
- Lack of central visibility into sales, service, and inventory across business units
- Difficulty in customizing standard apps without affecting the core S/4HANA system
- Limited IT infrastructure at branch locations, demanding a cloud-based extensibility approach

Technologies Used

SAP BTP (SAP Launchpad, Fiori Elements, Business Application Studio), SAP S/4HANA 2021 (RISE with SAP – PCE), SAP Cloud Identity Services, CAP (Cloud Application Programming) Model

Integration Approach

- Deployed SAP BTP Launchpad to centralize app access for different roles
- Activated and extended standard Fiori apps using SAP BTP without touching core S/4HANA
- Enabled role-based access control integrated with Cloud Identity Authentication
- Developed custom CAP-based applications for dealer management and service tracking
- Used SAP Business Application Studio to manage lifecycle of extensions

Target Infrastructure

SAP RISE PCE (Private Cloud Edition), SAP BTP, Jacksons Group Dealer Network (Hybrid Access)

Implementation Highlights

- Activated and deployed 100+ standard apps via SAP Launchpad service
- Built custom apps for service booking, sales approvals, and dealer performance
- Enabled responsive UI access across desktop, tablet, and mobile devices
- Reduced dependency on on-prem IT staff by leveraging BTP DevOps features
- Achieved faster rollout of digital apps with clear separation from core SAP

About Incesol

Established in 2011, Incesol is a leading provider of outsourced software development services specializing in SAP, enterprise e-commerce, mobility, and custom application development. With Headquarter in Dallas, Texas, USA, and a global development facility in Hyderabad, Telangana, India.
